Re: Kings Capital Construction Group Reference

To Whom It May Concern,

I am writing this letter on behalf of Michael Casarella and Kings Capital Construction. KCC is currently wrapping up a six month project in Irvington, NY where they performed site work as our sub-contractor. The completed project was over 3 million dollars with the site package upwards of \$800,000. Some of the services provided were mass excavation for addition and retaining walls, rock hammering, trucking, storm water mitigation systems, grading, masonry and asphalt.

Michael was hands on, as he was one of three operators consistently on site. He managed the skilled and professional team and worked well with other trades on site. The site was kept clean and they even plowed snow for us when they weren't working, to allow other contractors access. I will use them again in the future and recommend them to anyone in need of a good site contractor.

Thank you,

Joseph G. Viola Jr.
